

Example Claude Chat: Splitit MCP for Developer Documentation (Sample Integration)

Prompt:

I'd like to investigate my Splitit integration options

Call tool: [[get_onboarding_context]]

Response:

Splitit supports four integration methods:

1. **Platform plugins** — for WooCommerce, Shopify, BigCommerce, Magento, Wix, Salesforce Commerce Cloud, or SAP Commerce Cloud
2. **Checkout solutions** — custom websites using Splitit-hosted payment forms or embedded card fields
3. **Direct API** — full control over checkout flow (mobile apps, call centres, white-label)
4. **Splitit Go** — no-code portal for creating plans and sending payment links manually

Which integration method would you like to use?

Prompt:

1

Call tool: [[get_integration_guide]]

Response:

Which platform are you on?

- WooCommerce
- Shopify
- BigCommerce
- Magento
- Wix
- Salesforce Commerce Cloud
- SAP Commerce Cloud

Prompt:

WooCommerce

Call tool: [[fetch_doc]]

Call tool: [[fetch_doc_request_schema]]

Call tool: [[search_docs]]

Call tool: [[fetch_doc]]

Response:

Installation

1. In your WordPress admin, go to **Plugins → Add New**
2. Search for **"Splitit"**
3. Click **Install Now**, then **Activate**

Configuration

Connect Your Account

1. Go to **WooCommerce → Settings → Payments**
2. Toggle **Enable Splitit Payments**
3. Click **Login** — choose **demo** or **live** account
4. Select your **Merchant Account**, **Terminal**, and **Client ID**, then click **Connect my Merchant**

Key Settings

- **3DS** — enable/disable 3D secure verification at checkout
- **AutoCapture** — `Off` = authorize only (capture on shipment); `On` = authorize + capture immediately
- **Installment Ranges** — set price ranges and allowed installment counts (ranges must not overlap)

Example:

'''

\$100-\$500 → 2, 3, 4 installments

\$501-\$700 → 5, 6, 7 installments

'''

On-Site Messaging

Configure Splitit messaging (strips, banners, logos, one-liners) per page type: Home, Shop, Product, Cart, Checkout.

Admin Notes

- **AutoCapture off**: order status is **Pending** until you click **SHIP** to capture
- **Refunds**: use **Refund via Splitit** button (not manual cash refund) to properly sync with Splitit
- **Cancellations**: use a full refund, or a third-party plugin like "WC Cancel Order"

Do you need help with any specific step, like configuring installment ranges or on-site messaging?
